

# OpsMx Intelligent Software Delivery for Spinnaker

## Simplifies and Automates Continuous Software Delivery

OpsMx ISD for Spinnaker is a highly scalable, intelligent multi-cloud software delivery platform that leverages leading open-source project Spinnaker for its underlying orchestration functionality while adding simplicity, security, safety, and intelligence to the platform so that your team can ship better software faster.

### ML Powered Automated Verifications

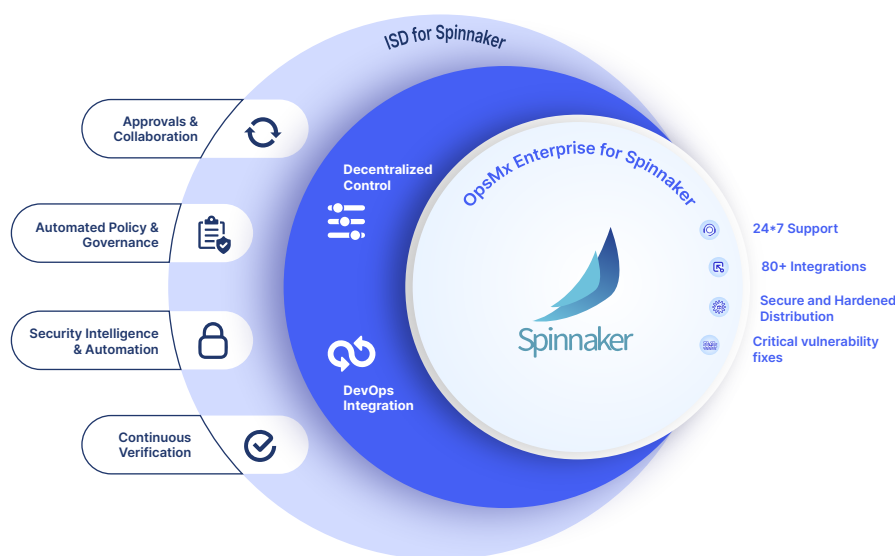

OpsMx ISD helps you automatically identify and mitigate risks at all stages of the CI/CD process. It leverages AI/ML on logs and metrics to find regression, and provide root cause analysis for faster diagnosis.

### Continuous Governance and Security

Make security verification and compliance an integral part of the software delivery pipeline by quickly defining SDLC policies and enforcing them in the delivery pipelines.

### Observability, Traceability, and Insights

Get real-time insights on application and deployment status, pending approvals, and an overview of software delivery performance with DORA metrics. OpsMx ISD provides audit reports for a chosen period highlighting who, what and when about pipeline execution and policy violations

### Key Benefits :

**Accelerate Release Velocity** - Save at least 3-4 hours per verification and increase release velocity with automated approvals and preconfigured security best practices and policies.

**Lower Deployment Risk**- Mitigate security risks of every update before deploying to production with Templated deployment strategies to reduce risk and improve confidence in deployments.

**Seamless DevOps Toolchain Integration**- 80+ prebuilt API integrations with ensures a smooth transition.

**Reduced Errors and Outages**- Expert configuration and pre-built best practices reduce outages and reduce burden on SREs.

**Enterprise Security and Compliance** - 100% compliance to industry standards with automated policy enforcement achieved through a hardened Spinnaker with pre-configured security best practices and fast fixes of security vulnerabilities before the community.

### Reduced Business Risk-

Access to OpsMx experts and 24/7 support help mitigate many operational and business risks commonly associated with open source.

## The OpsMx ISD Advantage

### AI-Driven Delivery Verifications

AI-powered intelligence to verify all software releases throughout the delivery pipeline including compliance, security and enterprise policies.

### Advanced Delivery Metrics for Operational Excellence

Ingest and analyze all CI/CD toolchain data from each workflow to continuously provide real time data to assess risk and make informed judgements.

### Developer Self-Service

Easily onboard Kubernetes and public-cloud accounts into Spinnaker using simple steps in the self-service UI.

### Scriptless Multi Cloud and Kubernetes Deployments

Enables Scriptless Safe , Fast and reliable deployments to Kubernetes or Multi Cloud environments. Supports Pipeline as code models.

### Continuous Security and Compliance

Ready-to-use enterprise security features including Auth, RBAC, Certificates, and secrets management.

### Advanced Deployment Strategies

Ensure safe deployments using pre-configured blue-green, highlander or canary strategies. Instant rollbacks at the click of a button.

### Autonomous Team Workspaces with Decentralized control

Apply Configuration changes to applications without accessing the cluster. Fine grained RBAC with extensive secrets management to achieve a fully isolated workspace for teams.

### No Excuse Support

An OpsMx subscription provides you with the 24x7 expert support you need to be successful at every stage of your Spinnaker adoption journey.

OpsMx provides a range of services, including CI/CD strategy, Spinnaker onboarding, support, and training. OpsMx's proven onboarding process achieves Continuous Delivery in just 30 days.
