

# Intelligent Software Delivery for Argo

Making software delivery in Kubernetes environments more secure, reliable, and scalable.

OpsMx Intelligent Software Delivery (ISD) for Argo extends the capabilities of open source Argo to meet enterprise management, security, and operations requirements. OpsMx ISD for Argo add-on modules can be used individually to automate release verification and progressive delivery, manage application deployment across existing open source Argo instances, and enforce software compliance policies, or together as a vendor supported, enterprise Argo platform. OpsMx ISD for Argo is available as SaaS, managed service, or on-premise installation.

## Key Features

### Visibility and Insights

Unified dashboard across multiple Argo instances

Get 360° visibility to your application deployments across the enterprise. ISD for Argo provides application status about deployments, health, and performance of all microservices across multiple clusters and cloud environments in a single plane.

### Audit and Supply Chain Traceability

#### Comprehensive Audit of actions involving people, process, and tools

Capture an audit record of all delivery & deployment actions in your software delivery process. ISD also provides software supply chain reporting and helps you trace CVE's impact on production.

### Delivery Intelligence

#### Automated validation of new releases

Use AI/ML to assess new releases. ISD automatically uses logs and metrics and identify to calculate performance, security, and reliability scores for any new release. Use out-of-the-box templates offered by ISD for Argo to kickstart intelligent verification of each release in blue/green, canary, and progressive deployments.

### Policy and Governance

#### Enforce release policies on GitOps style deployments

Use ISD for Argo to enforce security, approval, and operation policies in your GitOps process. With ISD, you can integrate the change approval process and other leading DevOps tools into Argo CD. Get notified about the compliance reporting for software delivery in frequent time intervals.

## Benefits of ISD for Argo

### 24x7 Enterprise Support

Maintain multiple Argo instances easily with 24/7/365 support from Argo experts. Get SOC-2 certified SaaS solution with 99.99% availability.

### 3X Faster Releases

Achieve high velocity releases with built-in features such as authentication & authorization, policy enforcement, and integrations with DevOps tools.

### Improved developer and SREs productivity

Maintain multiple Argo instances easily with 24/7/365 support from Argo experts. Get SOC-2 certified SaaS solution with 99.99% availability.

### Zero hassle CD migration

Migrate from existing CD solutions such as Jenkins / Spinnaker to Argo CD under the guidance of our GitOps experts.

## OpsMx is Trusted By

## About Us

OpsMx is a leading provider of Argo for enterprise usage. OpsMx offers 24x7 support for Open source Argo and Enterprise extensions for security, application on-boarding, and continuous verification. OpsMx has offices in the United States, Europe, and India.
