

Intelligent Software Delivery for Spinnaker

Simplify, Secure, and Automate Continuous Software Delivery

OpsMx Intelligent Software Delivery (ISD) for Spinnaker is a highly scalable, multi-cloud software delivery platform that enables enterprises to ship better software faster. OpsMx ISD leverages open-source Spinnaker for its underlying orchestration functionality adding simplicity, security, safety, and intelligence to the platform.

Key Features

Visibility and Metrics

Unified dashboard for all deployments

The Visibility and Insights module of OpsMx ISD for Spinnaker provides enterprise software deployment and delivery visibility. The module ingests and analyzes all CI/CD toolchain data from each workflow for complete visibility for each release and DORA metrics on the overall process

Audit and Supply Chain Traceability

Comprehensive Audit of actions involving people, process, and tools

Capture a complete record of all CI/CD events. The audit report generated by ISD helps investigate events with information on who deployed, what, when, who approved the release, and what data was used to approve the release.

Delivery Intelligence

Automated validation of new releases

Automate release verification processes during progressive delivery like canary and blue/green. Delivery intelligence module of ISD applies AI/ML to logs and metrics to estimate the performance, security, and reliability risks of new deployments.

Policy and Governance

Enforce release policies on GitOps style deployments

Automatically enforce security, approval, and deployment policies in your CI/CD process. ISD allows you to easily implement governance to make your SDLC compliant with industry best practices and standards.

Benefits of ISD for Spinnaker

5X Release Velocity

Save at least 3-4 hours per verification and increase release velocity with automated approvals and preconfigured security best practices and policies.

Zero Deployment Risk

Identify the performance, security and reliability risk and mitigate them before production rollouts. With zero deployment risks there will be less service interruption in the production.

100% Security and Compliance

Comply with industry standards such as GDPR with automated policy enforcements into delivery pipelines. Use pre-configured security best practices and fast fixes of security vulnerabilities before the community.

5X MTTR Improvements

With real-time visibility into application deployments and audit reports, DevOps team can take quick action to avoid deployment issues faster.

OpsMx is Trusted By

About Us

OpsMx is a leading provider of Spinnaker for enterprise usage. OpsMx offers 24x7 support for Open source Spinnaker and Enterprise extensions for security, application on-boarding, and continuous verification. OpsMx has offices in the United States, Europe, and India.
