

# OpsMx Enterprise for Argo

## True Open Source Enterprise-Ready Argo

OpsMx Enterprise for Argo (OEA) is an enterprise distribution of Argo CD, Argo Rollouts, Argo Workflow, and Argo Agents that empowers enterprises to transform their application delivery by removing the operational complexity of managing multiple Argo instances and providing a fast and secure way to scale Argo and Kubernetes in the enterprise.

### One Subscription For Your Entire Argo Journey

An OEA subscription provides you with the software, services, and support you need to ensure success at every stage of your Argo adoption journey.

#### GitOps for the Enterprise

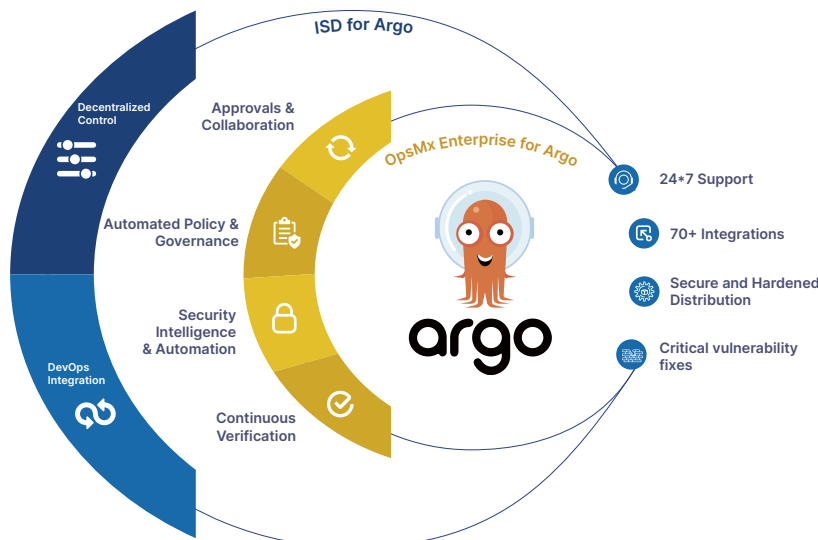

- Make deployments secure and scalable

#### Developer Self-Service Onboarding

- Remove the constraint of central IT

#### 24/7/365 Mission Critical Support

- Mitigate risks of community-based support

OEA was architected to be pluggable on top of Open Source Argo, preventing vendor lock-in

### True Open Source

With OEA you're enterprise-ready from day one, always have immediate access to Argo community upgrades and fixes, and are never locked into a vendor's proprietary distribution. Designed to be pluggable on top of Open Source Argo, OEA is the true open source alternative for modernizing your application delivery.

### Key Benefits:

#### Faster Adoption

An enterprise-ready distribution with expert onboarding services speeds adoption.

#### Reduced Errors and Outages

Expert configuration, support, and application of pre-built best practices with deployment strategies reduce outages and failed deployments.

#### Enterprise Security

OEA provides a hardened Argo with pre-configured security best practices and fast fixes of security vulnerabilities, resulting in reduced misconfiguration errors and fast issue resolution.

#### Lower Business Risk

Access to OpsMx experts and 24/7 support helps mitigate operational and business risks commonly associated with open source.

#### No Vendor Lock-In

OEA is pluggable on top of Open Source Argo, so you are never locked into a vendor's proprietary distribution.

## The ISD Advantage

 **GitOps for the Enterprise**

 **Safe Deployment Strategies**

 **Developer Self-Service**

 **Easy Operation**

 **Enterprise Security**

 **Kubernetes Native**

 **Scalable and Extensible**

 **No-Excuse Support**

### **GitOps for the Enterprise**

Use GitOps best practices to securely deploy complex applications into Kubernetes and keep your environments synchronized at scale.

### **Safe Deployment Strategies**

Implement blue-green, canary, or multi-service deployments with automated machine learning based analysis of rollouts.

### **Developer Self-Service**

Easily onboard Kubernetes and public-cloud accounts into Argo using simple steps in the self-service UI.

### **Easy Ops**

Achieve continuous delivery from Day-1 without any hassle with managed or SaaS Argo.

### **Enterprise Security**

Ready-to-use enterprise security features including Auth, RBAC, Certificates, and secrets management.

### **Secure and Hardened Distribution Image**

Hardened UBI8-based images, source and FIPS-140-2 validated. Pre-configured security best practices and timely security vulnerability fixes.

### **Scalable and Extensible**

Ensure smooth and painless enterprise-scale adoption with enterprise Argo and pre-build integrations for CI/CD tools.

### **No Excuse Support**

An OEA subscription provides you with the 24x7 expert support you need to be successful at every stage of your Argo adoption journey.

## About Us

OpsMx is a leading provider of Argo for enterprise usage. OpsMx offers 24x7 support for Open source Argo and Enterprise extensions for security, application on-boarding, and continuous verification. OpsMx has offices in the United States, Europe, and India.
