Solutions for Flux

OpsMx Intelligent and Secure CD for Flux offers scalable GitOps for K8s with security and compliance controls for your existing Open Source Flux implementations

VISIBILITY AND INSIGHTS

- **Visibility and controls** across multiple Flux instances.
- **DORA Metrics** Comprehensive view of software deployment performance using DevOps Risk Assessment metrics.
- **Security and RBAC** to define granular controls and set guardrails from the web interface

DELIVERY INTELLIGENCE

- **Automated Verification** of releases at scale (metrics and logs analysis) for a go or a rollback decision.
- **Automated Risk Scores** for quality, performance, reliability, and security.
- **Flagger integration** for advanced deployment strategies - blue-green, canary, progressive delivery.

FLUX DEVELOPMENT

- **CVE fixed Images** and hardened enterprise ready Flux CD.
- **Integrations and plugins** to connect with your existing DevOps toolchain.
- **Secure Software Delivery** with AuthN & AuthZ and integrations with secrets management.

AUDIT TRAILS

- **Workflow and System Audits** to capture what happened (who, what, when) across the entire GitOps deployment process.
- **Real-time Unified View** on how new releases are performing against older versions
- **Support for multiple CD tools** to get more value from your existing investments

SECURITY & GOVERNANCE

- **Central DevSecOps Dashboard** to understand security risks with deployments.
- **Deployment Firewall** to keep bad code out and prevent vulnerabilities from reaching deployments.
- **Automated Compliance and Security** policies for the GitOps process.

FLUX DISTRIBUTION & SERVICES

- **Enterprise Flux / OpsMx Secure CD for Flux** available both on-premise as well as SaaS.
- **Managed Flux** your open source Flux managed by our Flux experts.
- **Enterprise Support** 24×7 no excuses support for your Flux implementations.
